Anjan Patel

Edmonton, Alberta | +1 (825) 461-7909 | anjan@anjanpatel.ca | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Mechanical Engineering Technologist with 4+ years of progressive experience in Alberta's oil & gas and industrial sectors. Proven ability to manage high-volume inspection programs, lead cross-functional teams, and deliver technically sound engineering solutions under tight deadlines. Skilled at translating complex technical requirements into actionable work packages, maintaining QMS documentation, and driving continuous improvement. Currently eligible for P.Eng registration with APEGA, with a long-term goal of growing into a Project Management role within mechanical engineering operations.

CORE COMPETENCIES

Design & Drafting: SolidWorks 2024, AutoCAD 2024, P&ID Creation, 2D/3D Modelling
Inspection & QA/QC: Pressure Equipment Testing, NDE, NCR Management, Fabrication QA
Standards & Compliance: ASME, CSA, API, ISO, CAOEC
Safety & Quality: HSE Procedures, LOTO, Preventive Maintenance, Audit Preparation
Mechanical Systems: Hydraulic Systems, Rigging, Cranes, Pumps, Material Handling Equipment
Project Coordination: Work Package Development, ERP Systems, Scheduling, KPI Reporting
Documentation: QMS Updates, HSE Documentation, SharePoint, MS Office Suite
Communication: Technical Support, Cross-functional Collaboration, Technician Training

WORK EXPERIENCE

Mechanical Engineering Technologist *October 2024 – Present*
Kings Energy Services Ltd *Nisku, AB*

- Manage and execute inspections and functional testing of approximately 200 pressure equipment units monthly, ensuring full compliance with QA/QC policies, performance standards, and ASME/CSA/API codes.
- Collaborate with EQS Lead and P.Eng to interpret technical requirements, resolve engineering queries, and maintain audit-ready documentation.
- Create and revise 2D/3D engineering drawings, P&IDs, and component models using SolidWorks and AutoCAD 2024.
- Initiate, track, and resolve Nonconformance Reports (NCRs) for inventoried, serviced, and manufactured equipment not meeting specifications.
- Support QMS and HSE documentation updates, contributing to successful internal and external audits and a culture of continuous improvement.
- Manage job orders and equipment inventory through ERP systems, improving workflow efficiency and traceability.
- Develop equipment repair work packages for rig lifting equipment and lead onboarding and training of new technicians on standards and procedures.
- Provide technical support to internal teams and customers regarding product applications, specifications, and compliance requirements.

Mechanical Engineering Technologist *February 2023 – October 2024*
UnityRig Equipment Inc *Nisku, AB*

- Executed precision dimensional inspections using micrometers and calipers, ensuring component quality met engineering specifications.
- Led QA documentation efforts including engineering task records, project tracking logs, and corrective action reports to drive product quality improvement.
- Reviewed QA findings and implemented corrective actions, reducing rework and improving first-pass quality rates.
- Produced detailed CAD drawings and engineering models supporting design review and manufacturing processes.
- Supported continuous improvement initiatives through mechanical troubleshooting, root cause analysis, and process optimization.

Mechanical Maintenance Technician *November 2019 – April 2022*
Mayur Engineering Works *Gujarat, India*

- Performed routine and corrective maintenance on industrial machinery including hydraulic pumps, tanks, cranes, and material handling equipment.
- Maintained accurate PM records for all machines and operational lines, supporting annual maintenance planning and regulatory compliance.
- Assembled, disassembled, and replaced mechanical components including gears, bearings, belts, and tool bits.
- Conducted routine inspections of machinery and performed preventive maintenance to minimize downtime.
- Set up, operated, and maintained cranes, forklifts, and other material handling equipment safely.
- Performed basic welding, fabrication, and carpentry tasks to support repair operations as required.
- Enforced LOTO procedures and maintained safe, compliant work environments in accordance with plant safety policies.

EDUCATION

Bachelor of Engineering – Mechanical Engineering *May 2015 – June 2019*
Gujarat Technological University *Gujarat, India*

CERTIFICATIONS & PROFESSIONAL STATUS

- SolidWorks Certified Professional (2024)
- AutoCAD Certified Professional (2024)
- Eligible for P.Eng Registration – APEGA (Alberta)
- Class 5 Driver's License – Clean Abstract
